### FORM+FUNCTION

Melding style and state-of-the-art technology, the EchoBABY™ line of baby and toddler electronic solutions are designed with the most demanding parent or caregiver in mind.

# echo™ SOOTHE

“the audible pacifier™”

The unique look of the echo™SOOTHE unit is a result of a focus on form+function. The curvature of the front panel allows for both targeted directional delivery of sound while making it easier for the user to view and program.

Crystal clear sound is delivered regardless of range, powered by either DC or Alkaline batteries.

The echo™SOOTHE unit was created to comfort infants and small children with a focused selection of natural sounds. The echo™SOOTHE utilizes digital technology with long loop periods to create realistic sounds. It aims to provide a secure feeling while masking out unwanted background noise.

Studies have proven that babies, toddlers, as well as adults, go to sleep faster and sleep more deeply when exposed to these life-like sounds.

Additionally, the echo™SOOTHE unit is portable making it the right choice for the mobile parent or caregiver.
